

DC-KIT-B
Desiccant cartridge Kit

Desiccant cartridge for moisture indication on small length elliptical waveguides E100 to E220 with air inlet G1/8

Feature / Benefits

Desiccant cartridge to indicate high humidity. Granulate changes colour in the visual display from blue to violett in case the humidity in the closed waveguides system exceed 40%. In this case, purges of the waveguide with dry air (nitrogen gas) is recommended. The kit is unsuitable for drying closed waveguide systems with too high humidity.

Technical features

GENERAL SPECIFICATIONS

Content	1x Desiccant cartridge - in an airproofed can 1x Desiccant cartridge holder 1x Right angle adapter with G1/8" thread 1x Teflon Tape 1x Installation Instruction
